LinkLive Appointment Scheduling

Effortlessly schedule appointments across channels with LinkLive

Schedule Appointment

Simplify booking & optimize efficiency

LinkLive Appointment Scheduling is a digital-first application that allows your customers and employees to book online appointments across all digital touchpoints, including websites, digital banking, chat, and email signatures.

Flexibility

Appointment Scheduling can be easily configured to match the needs of customers and employees. Modify your product and service categories, sub-categories, business locations, hours of business, meeting options, and more.

Integration

The application connects directly to the calendars of your employees to eliminate double entry of calendar appointments while ensuring the availability shown to your customers is accurate and updated in real-time.

Why should you choose LinkLive Appointment Scheduling

Empower Customers to Self-Serve

Utilize agile appointment scheduling services to improve the customer experience, adding the convenience of scheduled virtual or in-person visits. No matter how your customers want to reach you, with LinkLive, customers can send secure mail, chat or call, or schedule a future appointment.

Reduce Admin Burdens

No other provider offers a full set of affordable digital customer services with their own Appointment Scheduling. The feature is fully embedded into the digital customer service and Contact Center solution, allowing employees to seamlessly manage appointments on LinkLive's desktop application and mobile app, LinkLive Mobile.
