REVOLUTIONIZED CONSUMER CONFERENCING

Revation Systems has introduced a new conferencing feature with CmyServices. These services are focused on the right workflow for either a one-on-one professional video visit or the ability to add multiple individuals in any combination of Agents and Guests.

Professionals can meet instantly in a secure meeting room or include in future appointments in the same way they always have. Then, each guest visits a specific URL for the professional and waits for the secure session to start.

Unlike traditional web conferencing that is focused on parties of 3 or more, CmyServices are easy to manage and no downloads required for anyone to use the service.
