# Revation SYSTEMS

LinkLive Chat

OVERVIEW

LinkLive is unified communications software hosted in the cloud that offers a broad range of capabilities including rich digital messaging, a seamless ability to engage humans across physical and digital channels, and leading voice, video communications, and innovation that you would expect.

> *Requires no downloads, no apps, and no accounts/passwords for customers to manage,*

EVOLVED INNOVATION

We have evolved and improved the user experience of the LinkLive services and how they are delivered/integrated in Revation customer's web sites. LinkLive Chat is a first of its kind to innovative chat solution that requires no downloads, no apps and no accounts/passwords for customers to manage. The solution modernizes how guests and customers interact with LinkLive messaging, video and voice services by easily integrating into their pre-existing websites while connecting to our customers and agent's existing LinkLive Communicator solution.

SUPPORTED BROWSERS

LinkLive Chat's multimedia features of voice/video conferencing and desktop sharing require the use of a HTML5 and WebRTC approved browser. On non-HTML5 and WebRTC browsers, the chat and file transfer features of LinkLive Chat are available.

VERSATILE ACCESSIBILITY

LinkLive Chat can be utilized from either a computer web browser or a web browser on a smartphone/mobile device. Unlike traditional web conferencing that is focused on parties of 3 or more, LinkLive Chat is focused on the right workflow for a one-on-one video visit.
